What I claim is:

 (Twice Amended) An automated merchandising system for computer software comprising:

a memory for storing software for distribution to customers; a point of sale terminal including customer interface means for receiving a software select customer choice input;

means for writing the software selected by the customer from the memory onto a software carrier; and

means for associating an identification code with the selected software provided to the customer,

said identification code comprising at least one of the following identification parameters: purchaser identification, point of sale identification and date of purchase,

wherein said means for associating comprises means for embedding said identification code on the software carrier; said identification code prevents copying by identifying the selected software provided to the customer on the software carrier.

- (Once Amended) An automated merchandising system for computer software according to claim 1 and also comprising means, associated with said customer interface means, for verifying means of payment.
- 3. (Original) An automated merchandising system for computer software according to claim 1 and also comprising means for printing manuals accompanying the software selected by the customer and dispensing same to the customer.
- 4. Canceled.
- 5. (Original) An automated merchandising system for computer software according to claim 1 and wherein said memory is located at a point of sale terminal.

- 6. (Twice Amended) An automated merchandising system for computer software according to claim 1 and wherein said memory is located at a location remote from a point of sale terminal and is connected therewith [terminals] by [means of]a modem.
- 7. (Original) An automated merchandising system for computer software according to claim 1 and comprising a plurality of point of sale terminals in communication with said memory.
- 8. (Original) An automated merchandising system for computer software according to claim 1 and wherein said memory also contains information used to print manuals.
- 9. (Twice Amended) An automated merchandising system for computer software according to claim 1 and wherein said point of sale terminal includes [means permitting] a modem for remote access by [a] the customer [via a modem].
- 10. (Twice Amended, now as original) An automated merchandising system according to claim 1 and also comprising means for dispensing said carrier bearing the software selected by the customer to the customer.

Canceled.

- 12. (Original) An automated merchandising system according to claim 1 and also comprising means for generating a sales report in hard copy form including at least one of the following identification parameters: purchaser identification, point of sale identification, program identification, date of purchase, serial number for program copy.
- 13. (Original) An automated merchandising system according to claim 1 and also comprising means for generating and displaying a menu for enabling a potential customer to locate software in which

he has a potential interest.

- Canceled.
- 15. (Once Amended) An automated merchandising system according to claim 1 and also comprising:

demonstration computer means for [providing to a potential customer the opportunity for] operating the software <u>by a potential</u> customer prior to a decision to purchase.

16. (Once Amended) An automated merchandising system according to claim 1 and also comprising:

means for generating a sales report in hard copy form including at least one of the following identification parameters: purchaser identification, point of sale identification, program identification, date of purchase, serial number for program copy; and

means for generating and displaying a menu for enabling a potential customer to locate software in which he has a potential interest[, and wherein said means for associating comprises means for imbedding said identification code on the software carrier].

Claims 17-77 are cancelled.
